

XM is the best entertainment service I've ever paid for. I love the variety of music and talk channels. I also love the traffic and weather channels when I'm traveling through other major cities. This information is very important and very easy to get on XM. If the FCC will reject the NAB's petition 04-160, it would honor the freedom of XM and it's listener's and keep us out of traffic jams. I pay for this service and don't feel that the NAB should be able to dictate what I listen to. Thank you for your time, John I Sherrer
